Two small waterfalls pour off limestone ledges and tumble into deep pools in Onion Creek not far from the center of Austin. They are part of McKinney Falls State Park, which provides a quiet, natural retreat from the noisy, busy city just beyond the park boundary. The highlights of the park, the upper and lower falls, were created when hard layers of limestone resisted erosion by the water of Onion Creek better than the other layers of softer rock. Eventually, the softer rocks eroded away, leaving higher ledges over which the water pours in cascades and falls.

Questions:

- 1) How many waterfalls are in this park?**
 - a. Two**
 - b. Four**
 - c. Three**
- 2) This park is located just outside of the boundaries of which city?**
 - a. Houston**
 - b. San Antonio**
 - c. Austin**
- 3) The type of rock that was not eroded by the creek is:**

Tiny Acton State Park is the smallest state park in Texas and, with dimensions of only 12 feet x 21 feet, it might well be the smallest park in the nation. The little-known park contains the grave of Davy Crockett's second wife, Elizabeth Patton Crockett, together with the graves of her son, Robert, and his wife Matilda.

Davy Crockett's first wife died of an unknown illness in 1813, leaving Crockett with three young children to raise by himself. Crockett met his second wife while exploring the Shoal Creek area in Tennessee. She was a widow with two young children, which placed her in a similar situation to that of Crockett. In 1815 they married in Lawrence County, Tennessee. They raised their separate children together, and added three new children to the family. For many years Crockett prospered as a businessman and Tennessee Congressman. In 1835, however, he lost a re-election effort and his business failed.

To make a new start, Crockett headed for Texas, arriving just in time for the Texas war of independence. Sadly, a few months later, he lay dead after the battle of the Alamo.

Questions:

1) What is the name of this tiny state park?

- a. Acton State Park**
