

BETTER ACCESS IS BETTER CARE

WAIT TIME FOR NEUROLOGY APPOINTMENT

BENEFITS

The average wait time nationwide for a neurology appointment has ballooned to 60 business days; compare that to an average of 19 business days for Kane Hall Barry

Here is how we do it:

- Multiple options to send a referral
- Dedicated Referral Coordinator
- Next appointment < 19 business days
- Appt Status & Visit Records ~ 3-10 business days

PATIENT TESTIMONIALS

"The entire staff is friendly and welcoming! They are extremely responsive when I need anything. Every visit is quick while still making sure I get my questions answered thoroughly. I highly recommend to anyone out there that needs this type of care!"

"Great people. Professional and knowledgeable. My doctor was just terrific. All of them very personable, understanding, and listened to everything I was concerned about."

"They have always taken time to listen to any and all of my concerns and issues I have. They spend real time with me making sure they understand and discuss measures and actions that can be taken to resolve any of my issues. I never feel rushed or like I'm not important. I always have their full attention and time. They are the most professional and caring physicians office I have been to in a LONG time. They are always accessible and explain in terms a non health professional can understand. I appreciate them for always making me feel heard. Great doctors and staff."

"I've been a patient for about 10 yrs now and I wouldn't go anywhere else. Both locations are nice and welcoming."

 **HOSPITAL CARE**

CENTERS OF EXCELLENCE

HEADACHE CENTER

Our headache center strives to both reduce the frequency & intensity of patient's headaches and migraines. We utilize education, medications, injections and infusion therapies to treat patients. We also have staff dedicated to obtaining authorizations and finding patient assistance programs. In addition, Dr. Arif and NP Debbie Stapel both have certificates of added qualification in headache medicine from the National Headache Foundation.

NEUROMUSCULAR CENTER

Myopathy, neuropathy, and ALS are just a few of the neuromuscular disorders we see at our neuromuscular center. We provide EMG testing with or without consult, skin biopsy, and utilize infusion therapy when needed. Dr. Ansari and Dr. Kahlon are trained in electrodiagnostic medicine and all of our technicians are certified by the American Board of Electrodiagnostic Medicine and the American Association of Electrodiagnostic Technologists.

MULTIPLE SCLEROSIS CENTER

Our providers have years of experience diagnosing and treating patients with MS. Drs. Barry, Maddukuri, and Shah have all been recognized by the National MS Society as "MS Partners in Care." In addition, Dr. Shah and Jessica Mason, FNP, both earned Multiple Sclerosis Certified Specialist certificates from the Consortium of Multiple Sclerosis Centers (CMSC). Our infusion center has a certified MS infusion nurse and our dedicated coordinators obtain authorizations and find patient assistance programs.

SLEEP CENTER

Our sleep center treats patients with obstructive sleep apnea, restless leg syndrome, insomnia, sleepwalking, narcolepsy, circadian rhythm, and REM disorders. We also offer home sleep tests which are less disruptive for patients and are sometimes preferred by insurance carriers. Dr. Maddukuri is board certified in Sleep Medicine and is uniquely qualified to treat patients with a multitude of sleep disorders.

CMT CENTER

Kane Hall Barry Neurology has been recognized as a Center of Excellence for Charcot-Marie-Tooth Disease (CMT) by the Charcot-Marie-Tooth-Association (CMTA). Dr. Sharique Ansari is the director of the CMT Center at Kane Hall Barry Neurology.

DEMENTIA CENTER

Navigating the ups and downs of cognitive decline, dementia and Alzheimer's is challenging to patients and their loved ones. Our office provides customized treatment plans, testing options, resources for families, and recommendations for care facilities in order to help our patients and their families during this difficult journey.

AMBULATORY INFUSION CENTER

Your patients will benefit from our experience infusing biologic drugs

Over half a million patients in the metroplex live with chronic autoimmune diseases. Many of their most effective medications - large molecule biologic or intravenous immunoglobulin (IVIG) products - must be administered under physician supervision.

With two locations to serve you, our neurologists and infusion RNs, including a certified MS nurse, run our infusion suites. Add our pre-authorization and financial assistance experience and your patient is treated quickly and conveniently.

We also offer non-biologic osteoporosis medications, steroids, infusible iron, and migraine treatments.

Medications we infuse include:

- Actemra[®]
- Orenicia[®]
- Soliris[®]
- Benlysta
- Prolastin[®]
- Steroids
- Evenity[®]
- Prolia[®]
- Tysabri[®]
- Gamunex[®]
- Panzyga[®]
- Ultomiris[®]
- Lemtrada[®]
- Reclast[®]
- Uplizna[®]
- Lidocaine
- Remicade[®]
- Vyepi[®]
- Ocrevus[®]
- Rituxan[®]
- Xolair[®]
- Onpattro[®]
- Robaxin
